

**New!**

# DuPont™ Guardian® Plus

pre-emergent herbicide

## **Enhanced** residual control of troublesome weeds in soybeans.

**Now there's an even more powerful way to get your soybeans off to a clean, weed-free start.**

**DuPont™ Guardian® Plus** is a new, broad-spectrum herbicide that can be applied from burndown through to early pre-emergence in no-till IP and GT soybeans. It can be used as a pre-plant burndown up to 30 days before planting or pre-emergence up to 3 days after planting. **Guardian® Plus** could be the only soybean herbicide you need this season!

### **Clean fields at a competitive price**

**Guardian® Plus** offers an impressive level of weed control that's hard to beat for its cost.

#### **Guardian® Plus offers:**

- Enhanced residual control of troublesome weeds like Eastern black nightshade, and herbicide-resistant (Group 2 and triazine) pigweeds and lamb's-quarters
- Best overall burndown for IP and GT soybeans
- Enhanced suppression of grasses like green foxtail
- Reduced early season weed competition

### **Three powerful active ingredients**

The active ingredients in **Guardian® Plus** are flumioxazin, chlorimuron-ethyl (CE) and glyphosate. They combine to deliver a powerful level of weed control in soybeans. Flumioxazin provides residual control of Eastern black nightshade and other broadleaf weeds, as well as suppression of some grasses. CE delivers knock-down and residual control of annual and perennial broadleaf weeds, in addition to suppression of annual grasses and volunteer corn. The third active ingredient, glyphosate is the foundation of any burndown treatment.

## A powerful boost over DuPont™ Guardian® herbicide

### Weeds controlled with DuPont™ Guardian® include:

- Annual sow-thistle
- Prickly lettuce
- Velvetleaf
- Dandelion
- Ragweed
- Yellow nutsedge (suppression)
- Lamb's-quarters (including triazine-resistant types)
- Redroot pigweed (including triazine-resistant types)
- Volunteer Adzuki beans (suppression)
- Wild carrot (suppression)

### Guardian® Plus adds control of these troublesome weeds:

- Eastern black nightshade
- Green pigweed (including triazine-resistant types)
- Improved control of common ragweed
- Hairy nightshade
- Redroot pigweed (including Group 2-resistant types)
- Green foxtail (suppression)

## Available in two convenient pre-measured packages

**Guardian® Plus** is available in a case designed to treat 10 acres. For larger soybean acreages, a 400 L MEGA™ tote treats 400 acres.

## Excellent Residual Control
