Vios G3

Overview

Application Tips

Overview

- Must be tank-mixed with glyphosate or Liberty® herbicide
- Registered for use in field corn
- Residual control of tough weeds (including group 2, triazine and glyphosate resistant biotypes)
- Contains two powerful new active ingredients, Group 2 thiencazzone-methyl and Group 27 tembotrione
- Easy-to-use concentrated liquid formulation; a 1.78 litre jug treats 40 acres
- Registered for ground application

Timing

From the 1-6 leaf stage of corn

Rate

Vios™ G3 herbicide	110 mL/ha
Liberty	1.0 L/ac
Glyphosate	Refer to glyphosate label

RECRIPPING INTERVALS

Time after application	Crops
0 months*	Field corn
4 months	Winter wheat
10 months	Alfalfa, canola, dry bean, oats, peas, soybean, spring barley, spring wheat
22 months	Potato, sugarbeet, tomato

* In the event that corn crop treated with VIOS G3 is lost due to environmental conditions and re-seeding is required, field corn may be reseeded immediately.

Application Tips

- Vios G3 provides residual weed control. Consult the label of the tank-mix partner for specific rainfast intervals
- Vios G3 must be tank mixed with either glyphosate or Liberty. It should not be applied alone
- When tank mixing, first add Vios G3 to ½ tank of water, followed by the tank-mix partner
- Apply with ground equipment. Do not apply by air
- Winter wheat can be planted four months after application

▼ Resistance Management

Tank-Mix Flexibility

Must be tank mixed with glyphosate or Liberty

Resistance Management

Vios™ G3 provides three modes of action when tank mixed with your choice of glyphosate or Liberty®. Each active ingredient works on both grasses and broadleaf weeds, making it the ultimate choice for resistance management.

▼ Crops

Field Corn

▼ Pests Controlled
