

CRIMSON™

WATER CONDITIONING AGENT FOR USE WITH GLYPHOSATES WITH HIGH SURFACTANT CONTENT AND MOST OTHER HERBICIDES REQUIRING AMMONIUM SULFATE

Protected by U.S. Patent No. 5,945,377

PRINCIPAL FUNCTIONING AGENTS:

Ammonium sulfate, and proprietary blend of water conditioning, coupling and antifoam agents.....	50%
OTHER CONSTITUENTS.....	50%
TOTAL.....	100%

All ingredients are accepted for use in application to growing agricultural plants

KEEP OUT OF REACH OF CHILDREN

CAUTION

Causes moderate eye irritation. Avoid contact with eyes, skin or clothing. Wear chemical-resistant gloves when mixing or handling product. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash clothing before reuse.

FIRST AID

IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

IF IN EYES: Hold eyes open and rinse gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eyes. Call a poison control center or doctor for treatment advice.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

STORAGE AND DISPOSAL

STORAGE: Store in secure area away from feed or food products. If frozen, bring back to room temperature, then shake well or re-circulate before use.

CONTAINER DISPOSAL: Do not reuse empty container. Triple rinse (or equivalent) during mixing and loading. Recycling rinsed containers is the best option of container disposal. Rinsed containers may also be disposed of in a sanitary landfill.

GENERAL INFORMATION

CRIMSON is an ammonium sulfate replacement that prevents glyphosate tie-up with free ions in the spray tank, which prevents reduction of efficacy of Roundup® and other glyphosate herbicides that are labeled for agricultural, aquatic, forestry, non-cropland, and right-of-way uses. CRIMSON may be used in spray applications when the pesticide necessitates an ammonium sulfate or ammonium nitrogen additive.

Manufactured for:
Agriliance, LLC
P.O. Box 64089, St. Paul, MN 55164-0089

DIRECTIONS FOR USE

Shake well before using

Carefully follow the precautions, restrictions, recommended use rates and application directions appearing on the pesticide label.

May be used with glyphosate potassium salt formulations.
May be used with pesticides registered for aquatic applications.

MIXING: Fill the spray tank half full with water and start agitation. Always add CRIMSON first with the agitator running. Then add the glyphosate herbicide and continue to fill spray tank. Do not mix CRIMSON with INTERLOCK™ in an induction system or container when both products are undiluted. Once mixed in water, both products are compatible in either mixing order.

USE RATE: CRIMSON often may be used at a rate of 1 to 1.5 litres per 100 litres of spray solution. The standard use rate is **1.25** litres per 100 litres. Depending on water hardness, rates may have to be adjusted up to 2 to 2.25 litres per 100 litres of spray solution.

When applying glyphosate herbicides with foliar micronutrients under extreme environmental conditions, or heavy pressure from hard to control weeds, it may be advisable to use CRIMSON at a rate of 2 to 2.25 litres per 100 litres of spray solution.

NOTE: When applying aurally, follow pesticide label directions including minimum water volume per hectare. Do not substitute CRIMSON for water required by the pesticide label.

NOTICE TO BUYER

Seller's guarantee shall be limited to the terms set out on the label and, subject thereto, the buyer assumes the risk to persons or property arising from the use or handling of this product and accepts the product on that condition.
