

New!

Polaris™

herbicide

Only from DuPont

Performance. Production. Price.

Count on DuPont for all your glyphosate needs.

Expanding the DuPont portfolio with Polaris™ glyphosate.

Glyphosate is a key tool in almost every grower's herbicide kit. With new Polaris™ exclusively from DuPont, you can be confident that your glyphosate is coming from a trusted source. It makes sense to choose Polaris™, since glyphosate is already an excellent partner to many DuPont sulfonyleurea (SU) herbicides. With Polaris™ you get access to an expanded herbicide portfolio from DuPont for control of a broad range of grass and broadleaf weeds. Choose Polaris™ only from DuPont.

Performance	Production	Price
Polaris™ is everything you expect from glyphosate, all backed by unparalleled DuPont service.	Polaris™ is made in North America to the exacting standards you expect from DuPont.	Competitive pricing makes Polaris™ the perfect way to round out your purchases from the DuPont portfolio.

Polaris™ fits with DuPont SU products in co-packs such as Galaxy® and Guardian® and as a tank-mix with Battalion®. DuPont SU herbicides already significantly enhance control of broadleaf weeds and, depending on the SU herbicide, can provide residual control. Glyphosate complements and completes the existing DuPont offering from burndown through in-crop applications and into post harvest.

Take full advantage of the value and service DuPont provides with our complete herbicide portfolio.

In Eastern Canada, Polaris™ will be sold in the Galaxy® and Guardian® co-packs as well as in two stand-alone offerings – a 10 L jug and a 400 litre tote.

Not all glyphosate brands are the same. Trust Polaris™.

- Made in North America under strict quality standards
- Guaranteed 360 g.a.e./L of active ingredient (glyphosate), present as isopropylamine salt
- Backed by DuPont

As with all herbicides, read and follow label instructions carefully.
